ML / Reinforcement Learning Engineer — Returning to IT after 10 years of entrepreneurship to take on the challenge of AI. First achievement: an end-to-end Warhammer 40,000 strategy game simulator and a Reinforcement Learning agent trained to play it. Strong background in **high-criticality IT environments** at HSBC and JP Morgan Geneva.

PROFESSIONAL EXPERIENCES

2025/06 – present **GAME ENGINE & ML ENGINEER | Independent Project** **End-to-end development of a strategy game with Reinforcement Learning agent**

Python, PyTorch, Stable-Baselines3, Gymnasium, TypeScript

- Rules engine: 7 game phases, multi-level 3D LoS, 100+ special rules.
- RL architecture: MaskablePPO, 1,389 boolean-masked actions, shared-weight entity encoders, pointer head over 32×32 CNN (AlphaStar-inspired).
- +90% win rate against 6 diverse-strategy bots — benchmark saturated.
- Progressive self-play: 15 learner stages + exploiters (OpenAI League approach).
- 6,000+ automated tests, strict Pyright/tsc typing, custom engine-invariant linters.
- React/TypeScript frontend: playable PvP/PvE, step-by-step replay, 6 factions.

2025/12 – 2026/01 **AI/ML DEVELOPER – Leg'Omnia | Remote**

- Developing AI features for a legal platform serving francophone African countries.
- Building intelligent chatbots and MCPs for legal environments.
- Optimising Elasticsearch RAG requests for semantic legal search.

2014 – 2024 (10 years) **MORTGAGE BROKER - Independent**

- Developed financial simulation tools for real-time mortgage optimization.
- Advised clients on optimization and loan negotiation (loans, insurance).

2010 – 2014 (4 years) **DATABASE PROJECT LEAD - JP Morgan | Geneva**

- Led Sybase, SQL Server, and Oracle database operations.
- Automated patching and maintenance, ensuring high availability.

2007 – 2010 (3 years) **SYBASE ADMINISTRATOR - HSBC | Geneva**

- Executed major version upgrades (12.5 → 15.0) with zero downtime.
- Reduced critical incidents from 105/year to near zero through automation
- Fully automated database administration:
➔ Self-managed servers (no DBA required) until decommissioning in 2018.

2003 – 2007 (4 years) **PRODUCTION ENGINEER - Mutuaide | Paris**

- Automated scripts, backups, and monitoring dashboards.
- Supervised migration and deployment of core software.

EDUCATION & CERTIFICATION

- ✓ 2026/04 **RNCP 6 / Bachelor** - Application Designer and Developer.
- 2024-2025 **Machine Learning certified** - Holberton School.
- **Databases** : Sybase – ASE 15, **Oracle** - Admin 1, **SQL Server** - Admin.

TECHNICAL SKILLS

✓ **Machine Learning & RL:**

Reinforcement Learning (PPO, action masking, curriculum learning, self-play), PyTorch, Stable-Baselines3, TensorBoard, LangChain, RAG, Elasticsearch, NLP, Vector Embeddings.

✓ **Development & Infrastructure :**

Python (Pandas, NumPy, Scikit-Learn), TypeScript/React, SQL, Git, REST APIs, Docker, Unix, Linux.
