

DATASHEETS

Each unit has a datasheet that lists the characteristics, wargear, abilities and keywords of its models. This section presents a summary of these elements and how they relate to playing the game.

1

EXAMPLE DATASHEET (PROFILES AND ABILITIES)

2

	M	T	SV	W	LD	OC
	5"	4	2+	7	4+	1

4

RANGED WEAPONS		RANGE	A	BS	S	AP	D
Example weapon [PISTOL]		12"	D3	2+	4	-1	1
Example weapon [RAPID FIRE 1]		24"	2	2+	4	0	1

MELEE WEAPONS		RANGE	A	WS	S	AP	D
Example weapon		Melee	4	2+	4	-3	1

3

ABILITIES

CORE: Deep Strike

FACTION: Angels of Death

Rites of Battle (Aura): While a friendly ADEPTUS ASTARTES CORE unit is within 6" of this model, each time a model in that unit makes an attack, re-roll a Hit roll of 1.

INVULNERABLE SAVE 4+

5

KEYWORDS: IMPERIUM, INFANTRY, CHARACTER, TERMINATOR

FACTION KEYWORDS:
ADEPTUS ASTARTES

6

EXAMPLE DATASHEET (WARGEAR AND COMPOSITION)

Tactical Squads have formed the backbone of Space Marine Chapters for ten thousand years. With access to a wide range of weapons, they can purge swathes of enemy infantry, scour battlefields clean of heavily armoured foes or punch burning holes through tanks.

7

WARGEAR OPTIONS

- The Space Marine Sergeant's bolt pistol can be replaced with one of the following:
 - 1 weapon from the Pistols list.
 - 1 weapon from the Melee Weapons list.
- The Space Marine Sergeant's boltgun can be replaced with one of the following:
 - 1 weapon from the Combi-weapons list.
 - 1 weapon from the Pistols list.
 - 1 weapon from the Melee Weapons list.
- If this unit contains 9 or fewer models, 1 Space Marine's boltgun can be replaced with one of the following:
 - 1 weapon from the Heavy Weapons list.
 - 1 weapon from the Special Weapons list.
- If this unit contains 10 models, 1 Space Marine's boltgun can be replaced with 1 weapon from the Special Weapons list.

UNIT COMPOSITION

- 1 Space Marine Sergeant
- 4-9 Space Marines

Every model is equipped with: bolt pistol; boltgun.

1

DATASHEET NAME

Here you will find the name of the unit.

2

PROFILES

These contain the following characteristics that tell you how mighty the models in the unit are:

Move (M): This is the speed at which a model moves across the battlefield. If a model has a Move of ‘-’ it is unable to move at all.

Toughness (T): This reflects the model's resilience against physical harm.

Save (Sv): This indicates the protection a model's armour gives them.

Wounds (W): Wounds represent how much damage a model can sustain before it succumbs to its injuries. If a model's Wounds characteristic is reduced to 0, that model is destroyed.

Leadership (Ld): This reveals how courageous, determined or self-controlled a model is. The lower this number, the better a model's Leadership is.

Objective Control (OC): This shows how effectively a model can exert control over an objective on the battlefield.

3

ABILITIES

Many units have special abilities and rules that may apply during the game, from Core Rules shared by many units to bespoke Psychic abilities and invulnerable saves. These will be described here, along with any rules that apply when larger models such as vehicles have suffered sufficient damage.

Some abilities are bestowed by items of wargear that models in a unit can be equipped with, and are known as Wargear abilities. These only apply while a model in the unit is equipped with the relevant item of wargear.

4

WEAPONS

Weapons are described with the following characteristics:

Range: How far the weapon can shoot. Weapons with a range of ‘Melee’ are melee weapons and can only be used in close combat. All other weapons are ranged weapons.

Attacks (A): This tells you how many attacks are made each time that weapon is used.

Weapon Skill (WS): This reflects the bearer's skill in wielding the relevant melee weapon.

Ballistic Skill (BS): This shows how accurate the bearer is when shooting with the relevant ranged weapon.

Strength (S): How likely the weapon is to wound a foe.

Armour Penetration (AP): This represents the weapon's ability to cut through the target's defences.

Damage (D): The amount of damage inflicted by a successful wound.

5

KEYWORDS

Datasheets have a list of keywords, separated into Faction keywords and other keywords. The former are used when deciding which models to include in your army, but otherwise both sets of keywords are functionally the same.

6

UNIT COMPOSITION AND OTHER RULES

This section details the number and types of models in the unit, and the default weapons and wargear those models are equipped with. It may also describe other interactions, such as how units with the Leader ability can attach to other units, and passenger restrictions that may apply to **TRANSPORT** models.

7

WARGEAR OPTIONS

Some datasheets have a bullet-pointed list of wargear options. When you include such a unit in your army, you can use these options to change the weapons and other wargear of models in the unit. The order you use these options in does not matter, but each can only be used once.

LEADERSHIP TESTS

If a rule requires you to take a Leadership test for a unit, roll 2D6: if the total is greater than or equal to the best Leadership characteristic in that unit, that test is passed. Otherwise, it is failed.

RANDOM CHARACTERISTICS

Some characteristics are a random value instead of a number. For example, a model's Move characteristic might be 2D6", or a weapon's Attacks characteristic might be D6. When a unit with a random Move characteristic is selected to move, determine the entire unit's move distance by rolling the indicated number of dice. For all other characteristics, roll to determine the value on an individual, per-model or per-weapon basis each time that characteristic is required.

AURA ABILITIES

Some abilities affect multiple models or units in a given range. These are known as Aura abilities and are tagged with the word ‘Aura’. A model with an Aura ability is always within range of its own Aura ability. A unit can be affected by more than one Aura ability at a time, but if a unit is within range of the same Aura ability more than once, that Aura ability only applies to that unit once.

PSYCHIC WEAPONS AND ABILITIES

Some weapons and abilities can only be used by **PSYKERS**. Such weapons and abilities are tagged with the word ‘Psychic’. If a Psychic weapon or ability causes any unit to suffer one or more wounds, each of those wounds is considered to have been inflicted by a Psychic Attack.

DEPLOYMENT ABILITIES

Some abilities are used during deployment, or when setting a unit up – either on the battlefield or into Reserves. These are known as Deployment abilities, and some widespread examples of these are presented below.

DEEP STRIKE

Some units make their way to battle via tunnelling, teleportation, high-altitude descent or other extraordinary means that allow them to appear suddenly in the thick of the fighting.

During the Declare Battle Formations step, if every model in a unit has this ability, you can set it up in Reserves instead of setting it up on the battlefield. If you do, in the Reinforcements step of one of your Movement phases you can set up this unit anywhere on the battlefield that is more than 9" horizontally away from all enemy models.

- Unit can be set up in Reserves instead of on the battlefield.
- Unit can be set up in your Reinforcements step, more than 9" horizontally away from all enemy models.

SCOUTS

Scouts form the vanguard of many armies. Unnoticed by the enemy, they range ahead of the main force.

Some units have 'Scouts x"' listed in their abilities. If every model in a unit has this ability, then at the start of the first battle round, before the first turn begins, it can make a Normal move of up to x" as if it were your Movement phase – as can any **DEDICATED TRANSPORT** model such a unit starts the battle embarked within (provided only models with this ability are embarked within that **DEDICATED TRANSPORT** model). A unit that moves using this ability must end that move more than 9" horizontally away from all enemy models. If both players have units that can do this, the player who is taking the first turn moves their units first.

Example: A unit has the Scouts 6" ability. At the start of the first battle round, the controlling player can make a Normal move with that unit of up to 6".

- **Scouts x"**: Unit can make a Normal move of up to x" before the first turn begins.
- If embarked in a **DEDICATED TRANSPORT**, that **DEDICATED TRANSPORT** can make this move instead.
- Must end this move more than 9" horizontally away from all enemy models.

INFILTRATORS

Many armies employ reconnaissance units who can sit concealed, waiting for the right moment to strike.

During deployment, if every model in a unit has this ability, then when you set it up, it can be set up anywhere on the battlefield that is more than 9" horizontally away from the enemy deployment zone and all enemy models.

LEADER

Mighty heroes fight at the forefront of battle.

Some **CHARACTER** units have 'Leader' listed on their datasheets. Such **CHARACTER** units are known as Leaders, and the units they can lead – known as their Bodyguard units – are listed on their datasheet.

During the Declare Battle Formations step, for each Leader in your army, if your army also includes one or more of that Leader's Bodyguard units, you can select one of those Bodyguard units. That Leader will then attach to that Bodyguard unit for the duration of the battle and is said to be leading that unit. Each Bodyguard unit can only have one Leader attached to it.

While a Bodyguard unit contains a Leader, it is known as an Attached unit and, with the exception of rules that are triggered when units are destroyed (pg 12), it is treated as a single unit for all rules purposes. Each time an attack targets an Attached unit, until the attacking unit has resolved all of its attacks, you must use the Toughness characteristic of the Bodyguard models in that unit, even if a Leader in that unit has a different Toughness characteristic. Each time an attack successfully wounds an Attached unit, that attack cannot be allocated to a **CHARACTER** model in that unit, even if that **CHARACTER** model has lost one or more wounds or has already had attacks allocated to it this phase. As soon as the last Bodyguard model in an Attached unit has been destroyed, any attacks made against that unit that have yet to be allocated can then be allocated to **CHARACTER** models in that unit.

- Before the battle, **CHARACTER** units with the Leader ability can be attached to one of their Bodyguard units to form an Attached unit.
- Attached units can only contain one Leader.
- Attacks cannot be allocated to **CHARACTER** models in Attached units.
